## open wood fires

Warmington Wood Fires are designed and built here in New Zealand for our unique conditions, and are a modern alternative to the traditional open fireplace. With Caitec air replacement technology, air is re-introduced back into the home via a multi-duct heat exchanger to give maximum heat efficiency and high output, without the need for unsightly internal air vents.

### Features and Benefits

- Stunning indoor feature with 'ambience to burn'
- Caitec technology gives maximum efficiency and heat output
- Fantastic range of styles and sizes for every situation
- Easily installed into new or existing fireplaces
- Available in double sided twin fires
- Proudly designed and manufactured in New Zealand

Sizes: 440 - 1800

## traditional fires

Unlike traditional bricked back fires of yesteryear, the Warmington Traditional fires are built with today's modern technology. This means you can enjoy a modern heating appliance, without sacrificing the ambience of a real wood burning fire.

### Features and Benefits

- Higher heat output than the standard brick backed fires
- Caitec technology gives maximum efficiency and heat output
- Traditional brick look for modern or traditional homes
- Available in both wood and gas
- Large range of sizes and bricking styles
- Proudly designed and manufactured in New Zealand

Sizes: 800 - 1500

## debonaire range

The Debonaire range is for those looking for something unique. The single open style of the Uno, or if you wish to see both sides, go for the Duplo. The corner Virage, or the three sided Trieste are other options available. Whichever one you choose will be a central feature in your home, and allows you to use your imagination and make your own personal statement.

### Features and Benefits

- Available in LPG or Natural Gas
- Electronic control option for added simplicity (high/low fire)
- Range of different styles and sizes i.e. glass, stainless steel
- Proudly designed and manufactured in New Zealand
- Simple and easy to install

Sizes: 1200 - 2800

## gas fires

Warmington Gas Fires come in a range of styles and sizes to suit every situation and budget. The gas fires also have a unique built-in down draft diverter system to ensure safety and a cleaner environment. The Caitec system ensures additional heat which would otherwise travel up the chimney, is returned to the room. Available in LPG or Natural gas.

### Features and Benefits

- Available in LPG or natural gas
- Caitec technology maintains higher heat output
- Electronic control option for added simplicity
- Available for retro-fitting into existing fireplaces
- Available as a twin fire (double sided)
- Range of grate styles - traditional, pure and classic
- Proudly designed and built in New Zealand

Sizes: 700 - 1800
